

ARMOURCOAT™
SURFACE FINISHES

Colourwash

Pearlescent & Metallic

The Pitted or Dragged finishes can be further enhanced by the application of a Colourwash. A transparent glaze combined with pure pigment, metallic or pearlescent powder is applied to the plaster, enriching the surface, imparting contrasts of colour and subtle variations of tone.

The Colourwash finish, with its rich tones is ideal for large walls, feature areas and dramatic display backdrops, especially when combined with creative or dramatic lighting.

The Pearlescent and Metallic glaze is a luxurious manner of finishing decorative plaster. Without substantially altering the plaster colour, Pearlescent glaze imparts a subtle sparkle or shimmer. The glaze can be applied to almost any surface, but is seen to its best advantage on Pitted or Dragged finishes. When colourwashed, the glaze is held in the surface, dramatising texture and directional effect, the pigment or other additive deepens and highlights the overall context. It is a powerful finish; demanding attention and interest, perfect for feature screens and areas where a strong directional effect is sought.
